Invitation to a seminar on

Research in mathematics education

Luleå University of Technology, in cooperation with The Swedish Association for Research in Mathematics Education (SMDF) and the group of researchers in mathematics education at Umeå University, invites to a research seminar on March 24-25 2001 at the Mathematics department, Luleå University of Technology, Luleå.

Program

Saturday March 24

13.00-14.00 Rudolf Straesser *Mathematics Education as a Scientific Activity– a perspective from vocational education*

14.00-15.00 Parallel presentations by participants

15.00-15.30 Coffee

15.30-16.30 Panel discussion *Research in mathematics education in Sweden.*

16.30-18.00 Discussions in groups as a follow up of the panel discussion to put forward relevant research questions

Dinner and get together activities in the evening

Sunday March 25

8.30-9.30 Lisen Häggblom *Children's mathematical development*

9.40-10.40 Rudolf Straesser *Dynamic Geometry software (DGS) as a tool for Learning and Doing Mathematics - examples and comments*

10.40-11.10 Coffee

11.10-12.10 Parallel presentation and/or work in small groups

12.15-13.00 Summary and final.

Local organising group

Barbro Grevholm (chair), Luleå, Lars-Erik Persson, Luleå, Anna Klisinska, Luleå
Christer Bergsten, SMDF, Johan Lithner, Umeå

Please send an email to barbro.grevholm@sm.luth.se if you want to participate. We will then send you more information about practical questions concerning the seminar.

If you want to present a paper in one parallel session please give the title of your presentation. The presentation may be a draft of a research idea or plan or something that you want more experienced colleagues to react on.

We have to take a small conference fee (SEK 300) for material, refreshments and the meal in the evening
